

**Results of the *Value of Information* Experiment
Nugent PhENOM Seminar, October 18, 2012**

The goal of Copenhagen Consensus 2012 was to set priorities among a series of proposals for confronting ten great global challenges. A panel of economic experts, comprising some of the world’s most distinguished economists, was invited to consider these issues.

Assuming you are one of those Nobel economists, please allocate your 5 votes across the below proposals. Use rankings to indicate the priority ordering among your choices.

TOPIC	HEARD PRESENTATION ABOUT CHRONIC DISEASES		DID NOT HEAR PRESENTATION ABOUT CHRONIC DISEASES	
	Priority	1 st Priority	Priority	1 st Priority
Biodiversity				
Chronic Disease	27%		20%	
Climate Change	3%	1	7%	
Education	16%	1	13%	
Hunger	6%		7%	
Infectious Disease	20%		26%	
Natural Disasters	10%	1		
Population Growth	10%	1	13%	
Water and Sanitation	6%		13%
